*Training Center Management Software*

## **WorldPoint ONE Technical Note 106**

### **MODIFYING INSTRUCTOR TOOLS Reference Table for Heartsaver Classes**

Thank you for selecting WorldPoint ONE as your solution for Training Center Management. These instructions are for users of WorldPoint ONE Instructor Tools, version **1.06** or below.

At the MAIN MENU after clicking the **SetUp Information (Required)** button you will find a second button labeled **BLS/FA Course SubOptions Listing**, click this button. A list will appear containing the combinations for the Heartsaver CPR, AED and first Aid programs. Under the new 2005 AHA Guidelines, this matrix needs to be modified to reflect the list below. This is done by directly editing the existing list to MATCH EXACTLY the listings below and by deleting and/or adding additional lines.

1. **ADDING a Line:** If you wish to **DUPLICATE** a line as a starting point, click your mouse on the line to be duplicated. Go up to the Records MENU and locate the **DUPLICATE RECORD** command (ctrl-D). Then edit the duplicated line.
2. **DELETING a line:** If you wish to **DELETE** a line from the list, click your mouse on the line to be deleted. Go up to the Records MENU and locate the **DELETE RECORD** command (ctrl-E). It will pop up a confirming message regarding deleting this record. **MAKE SURE you do NOT select the DELETE ALL RECORDS choice as it will remove all lines at once.**

The listing is on Page 2 of this Technical Note.

Regards,

Your WorldPoint ONE Support Team
